

## Case Study

Hotel Indigo Stratford upon Avon

Formerly the Falcon Hotel, this stunning historic building has been in the heart of the Stratford-upon-Avon neighbourhood for centuries.

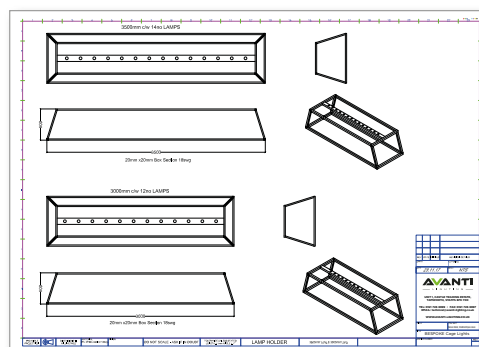

Once a 16th century residence, the original Tudor decorative black and white half-timbering and slanted windows is now blended perfectly with a modern and stylish design that provide guests with a unique boutique hotel.

The original Falcon Hotel property was a private dwelling for some 150 years after it was built before becoming a hostelry. Taking many forms over the years, including being several private properties, the latest chapter forms the individual and fascinating Hotel Indigo Stratford upon Avon.

### BESPOKE LIGHTING

Throughout the hotel there was a need for bespoke lighting elements to enhance and highlight the original historic features of the building this was handled by our innovative in-house Bespoke Lighting Division.

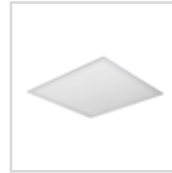

## CORRIDORS, GYM & RECEPTION AREA

The corridors are all lit using the Anti Glare Downlights along with the gym and reception areas. This gave a nice level of functional lighting whilst working with the decorative elements in these areas. The reception also has LED panels behind the reception desk.

### Products Used

ANTI GLARE

LED PANEL

## EN-SUITE & BEDROOM ENTRANCE LOBBY

The bedroom lobby area along with the en-suites are illuminated using the 10W Fire Rated Downlights

### Products Used

FIRE RATED DOWNLIGHTS

## PUBLIC TOILETS

The public toilets are tastefully decorated and use our Fire Rated 10W Downlight controlled by a PIR sensor.

### Products Used

FIRE RATED DOWNLIGHTS

## EMERGENCY EXITS

The client wanted all of the emergency lighting throughout the public areas of the hotel to be linked to an emergency monitoring system which we also provided.

### Products Used

FLEXI EXIT

## COURTYARD GARDEN - EXTERNAL LIGHTING

Within the courtyard garden we were tasked with illuminating the area discreetly. The client did not want to see fittings so where possible we used the planted areas to conceal the fittings and discreetly pick out features to provide a subtle pathway wash. The emergency lighting has been achieved in this area by using emergency converted LED bollards.

### Products Used

LED BOLLARD

STEP LIGHTS

EYELID

LED FLOODLIGHT

## CAR PARK

In the multilevel car park we chose to use non corrosive fittings and in the staircases we used our Luna fittings and wall mounted them.

### Products Used
