

Woodrowe Health Care

The end client Woodrowe Health Care, are providers of specialist care and rehabilitation for adults with acquired brain injury; neurological and complex needs.

We were involved right from the start with this project working alongside the contractor and got to understand the clients needs and demands for the lighting required throughout the building.

We put together a proposal for the lighting and we also offered additional services by way of the electrical heating system and providing the electrical mains distribution equipment. These additional services are all part of our turnkey project solution offering.

BISTRO AREA

In the Bistro area, a more modern look was required, with a high ceiling and large glass canopy central to the ceiling then a pendant style fitting would be ideal.

We chose to use 6 of our pendant 400mm Glass LED Globes at staggered heights along with a curved 's-shaped' luminaire near the entrance door.

All fittings are dimmable via our Smart Wireless control system.

Products Used

AP-Curve/3K
Curved Hanging 3K Luminaire

AP-Globe/P/3K/400
Glass Hanging LED Globe Pendant

CORRIDORS & PUBLIC AREAS

Products Used

2x30w Non Corrosive Fitting

OFFICES

AG-GH-PBD-18/4
18w Round LED Panel

EXTERNAL BUILDING LIGHTING

AP-WPR30LED
30W LED WallPack

Regarding the heating on site, the client needed an electrical heating solution as there is no mains gas to the property. Woodrowe wanted an energy efficient solution that was easy to use. After reviewing several options, we proposed the ATC Lifestyle range of radiators. These ticked all the boxes of being, energy efficient, easy to programme and aesthetically pleasing.

The mains panel board and the additional sub boards through the building were MEM, which was the contractors preferred manufacturer for this project.
